

## **Module Name: Hotel, Room, and Product FAQ**

**Module Description:** The "Hotel, Room, and Product FAQ" module is designed to help businesses in the hospitality industry create informative and user-friendly lists of frequently asked questions for their hotels, room types, and products. It leverages AI to generate relevant questions and answers to assist potential customers.

### **Key Features:**

- **Product Selection:** Users can choose whether they want to create FAQs for a hotel, specific room types, or products and services within the hospitality industry.
- **Customization:** The module allows users to input specific information about the property or offering, including features, policies, and any common queries they anticipate.
- **AI-Generated FAQs:** Utilizing AI algorithms, the module automatically generates a list of frequently asked questions based on the provided information.
- **Editing and Ordering:** Users can review and edit the generated FAQs, reorder them, or add additional questions and answers as needed.
- **Categorization:** Users can categorize FAQs into different sections for easy navigation and organization.
- **Multilingual Support:** Users can create FAQs in multiple languages to cater to international audiences.

### **Benefits:**

- **Customer Assistance:** FAQs provide quick and helpful answers to common customer queries, improving the user experience.
- **Time Savings:** Generate comprehensive FAQ lists without the need for extensive manual content creation.
- **Consistency:** Maintain a consistent format for FAQs across different properties or offerings.

**Opinion:** This module is a valuable addition to your platform, as FAQs are essential for addressing common customer queries and providing valuable information. AI-generated FAQs can help businesses save time while ensuring that customers receive accurate and up-to-date answers to their questions.
